

# Masterpiece Living Dashboard

## 1. Team Member Engagement

Team members are encouraged and permissioned to further the successful aging culture by leading programs that are outside of their typical job description. This measure will be calculated by the designated contact at your organization. Count and input the number of programs led by a non-lifestyles team member on an **annual** basis. (If one program is offered multiple times per month, count it only once.) Organizations meeting this standard have 5 or more team member-led programs.

## 2. Resident Empowerment

Programs in all applicable levels of living are organized, directed, and led by residents and make up a large portion of the lifestyle calendar. This measure will be calculated by the designated contact at your organization. Count and input the number of resident-led (planned and executed) programs offered **each month**. (If one program is offered multiple times per month, count it only once.) Organizations meeting this standard have 40% of their programs being led by residents/members.

## 3. Community Wide Initiative

Team members purposefully invited to participate in programs and activities with residents/members are actively participating in “blended programs”. Blended programs might be offered on a regular basis or as special events, and give both residents *and* team members the opportunity to age successfully together. This measure will be calculated by the designated contact at your organization. Count and input the number of programs that are open (and promoted) to both residents *and* team members on a **quarterly** basis. (If one program is offered on an on-going basis, it counts as **one** program in that quarter.) Organizations earn a green symbol by offering 8 blended programs each year.

## 4. Research Based Tool Utilization

Frequent use of Programs by Masterpiece and participation in the Masterpiece Living Campaigns are encouraged. Programs by Masterpiece are research-based, pilot-tested programs developed by the both the experts at Masterpiece Living and experts in the related fields. This measure will be calculated by the designated contact at your organization. Click each Program or Campaign offered to each applicable level of living for the **current calendar year**. Organizations earn a green symbol by offering 4 or more Campaigns and Programs by Masterpiece Living each year.

## **5. Review Participation**

The Masterpiece Living Reviews are a priority to drive individual goals, community programs and to make data-driven decisions. This measure will calculate the total number of participants who completed a review during the current calendar year divided by the number of individuals at your organization. Please note: this calculation is based on the number of residents living in each level as recorded in your community profile. If the occupancy numbers in your profile are not accurate, the review participation percentage will not be accurate. This measure is automatically calculated so no additional data entry is necessary. Organizations earn a green symbol by having 50% of individuals participate in Masterpiece Living reviews.

## **6. Successful Aging Score**

For individuals, each of the four components in the Lifestyle Review is worth a total of 25 points. The four component totals are added together to create the successful aging score. This graph shares the organizational average for the current calendar year. This measure is automatically calculated so no additional data entry is necessary. Organizations with a green symbol have an average score that is higher than the MPL Network average.

## **7. Human Capital**

The Lifestyle Review includes the following question: How often do you have opportunities to use your skills, abilities and experience? Participants can answer: very often, quite often, somewhat often, not very often or not at all. The dashboard graph represents the percentage of participants who answered very often or quite often. Organizations with more than 40% of participants answering Very Often or Quite Often will earn the green symbol.

## **8. Date of Last Strategy Session**

Once each year, your Partnership Specialist visits your organization to review your organizational data and work with your team to identify goals and strategies for the year ahead. Organizations that have had a Strategy Session within the past 12 months meet this standard.

## **9. Monthly Call Utilization**

The monthly call provides an opportunity for customized collaboration between your team and Masterpiece Living. This monthly outreach supports the continued growth of your culture and advancement of your organization's unique goals. Communities who have attended 11 of the past 12 monthly calls meet the standard of participation.

## 10. Network Call Participation

Network calls are an opportunity for MPL partners to learn about research, cutting edge resources, and Master Practices. The Masterpiece Living team enters this data.

Organizations who have at least one person registered and in attendance each month for 11 out of 12 months meet this standard.

## 11. Fall Risk

Participants in the Mobility Review complete Tinetti Gait, Tinetti Balance and Functional Reach exercises. The three scores are added together for a Mobility Score with a possible total of 30 points. If the community average for the current year is in the low fall risk category, you will see a green symbol for your community. If your community has moderate risk, you will see the caution sign and if your community is at high risk, you will see the risk sign. **There is no additional data entry necessary;** the data is pulled directly from the database.

## 12. Reported Falls

On the Lifestyle Review, participants are asked: In the past year, how many falls have you experienced? The Masterpiece Living Portrait shows the percentage of residents who reported one or more falls. The dashboard identifies whether your community has more falls (red), the same number of falls (orange), or less falls (green) than the MPL Network. **There is no additional data entry necessary;** the data is pulled directly from the database.

The following items are in the process of development. Your organization will have an at-a-glance view of participation in Masterpiece Living Training.

13. Fully Trained Champion Team

14. Organization Wide Training

## 15. Overall Score

On the top left side of the dashboard, you will see a picture of a gauge. Each item on the dashboard is worth a total of 1, 2 or 3 points, adding up to a total allowance of 35 points on the dashboard. The scores below identify the color your dashboard score will show:

- 0 – 11 = RED
- 12 – 22 = YELLOW/ORANGE
- 23 – 34 = GREEN
- Full 35 points = GOLD

Note: This 35-point total may change with the ongoing development process.

## **16. Community Goals and Strategies**

Once each year, your Partnership Specialist visits your organization to review data and identify goals and strategies for the year ahead. Your organization's identified goals and strategies are listed below the dashboard.
