

## Network Practices: Environmental Services

### **Movement Inspired by Nature**

*Plymouth Village*

When one resident pointed out that our tree map (which identifies the trees surrounding our community) was outdated, we used Movement Matters as a means to create an updated version. Every Tuesday and Thursday a group would walk and talk about the trees. We plan on learning all of the trees, updating the tree map, making a tree book, and starting nature classes.

### **Behind the Scenes**

*Multiple Communities*

Offer residents the opportunity to take a behind-the-scenes tour of the community to see what is involved in the job of a grounds/maintenance team member.
